

digitalWall

Steps to run :-

- Install react-router-dom
- Install react-icon

Step 1 : Front page with animation gets loaded (Need to join with name else will not be able to join)

Step 2 : Boards page is called ('/home') user can add and delete boards. Edit date is an add-on feature

Step 3 : Posts page is called ('/post') where user can post their images (jpg, png, webp files supported)

Step 4 : Bookmarks page is called ('/bookmark') where user save their bookmarks

Navigation bar is on left side – can be navigated to any page using API calls
